Making training and inspections easier with SafetyCulture

SafetyCulture's mission is to help companies achieve safer and higher quality workplaces all around the world through innovative, low-cost mobile-first products.

iAuditor mobile inspection platform

SafetyCulture's iAuditor platform can be used to perform quick checks and detailed inspections.

- You can choose from a host of available checklists, including Aviva's own Loss Prevention Standards, or you can upload or bespoke your own checklist to suit your business needs.
- These checklists can then be instantly distributed for use via a mobile app to your frontline workers to create real-time monitoring.
- You will have immediate visibility across all your locations, which will be particularly beneficial throughout reopening, managing and adapting to living with Covid-19.

Team Train mobile video training solution

Team Train is a mobile video training solution which can be used by organisations to record their own short and simple training clips and deliver them direct to their staff via a mobile app. A great solution for distance learning on the go and of particular value in the current climate.

Infection control services from Orbis

Infection control is the process used to disperse a specialist cleaning agent to eradicate bacteria, viral and fungal infections that are both airborne and surface based.

Orbis uses a vapourisation treatment that disperses non-toxic, non-corrosive disinfectant into the air killing 99.999% of known viruses, bacteria and fungi, including Coronavirus, by destroying the DNA. The process includes wiping down hard surfaces to remove any RNA traces.*

Orbis have the capacity to suggest a type of clean bespoke to individual site usage and requirements.

Other back to business services from Orbis include:

- Temperature Monitoring Access Control – integrated facial recognition and temperature monitoring
- Return to work inspection services
- Protection for unoccupied properties

*Orbis: <https://www.orbisprotect.com/aviva-specialist-partner/>

Disinfection and infection control services from VPS

VPS provide anti-viral disinfecting services that are suitable for both property and vehicles using non-toxic fogging.

Their disinfection service utilises a treatment known as fogging or misting, whereby machines can fill rooms or vehicles with a fine mist of disinfecting particles. The residue left by this treatment continues to have anti-viral properties for up to seven days after the initial treatment.*

Other back to business services from VPS include:

- Return to work site inspection services
- Protection for partially unoccupied properties

*VPS Group: <http://www.vpsgroup.com/aviva>

Capacity control systems from SECOM

SECOM plc are specialists in providing tailored solutions in CCTV, fire and intruder alarms and have a number of products that are tailored to provide specific solutions in the current climate.

Capacity Control

The system utilises 4D IR technology to accurately monitor the flow of customers and employees in and out of a business, with prominent monitors and displays that inform customers when it is safe to enter and when they must wait for admittance. This reduces the need for manned security at the front door.

Secom Announce

Announcements are delivered via an intelligent IP speaker, allowing businesses to transmit social distancing and good hygiene reminders, as well as any other bespoke messaging. This is a cost-effective alternative to in-store chaperones, keeping staff safe and allowing them to focus on other areas of the business.

Thermal Imaging Technology

SECOM can also offer elevated temperature detection via fixed or portable thermal imaging camera technology. Bespoke facial recognition linked with access control can be provided.

Return to work safety review from RoSPA

Royal Society for the Prevention of Accidents is an independent charity with more than 100 years' experience in saving lives by promoting safe and healthy practices. One key area for RoSPA is the provision of safety advice and with this in mind, they are able to offer a specific return to work safety review.

Covid-19 Back to work safety review from RoSPA

RoSPA's return to work review will give businesses peace of mind to open their doors and others the confidence to go through them.

Businesses will receive an onsite visit, in line with social distancing guidance, by one of RoSPA's nationwide safety experts. RoSPA will then issue a report, detailing the areas that the business is currently addressing, as well as those areas that require attention. Upon completion a RoSPA-branded certificate will be produced for businesses to display at their workplace entrance and on their website.

Driving safely with Drive iQ

Driver wellbeing is at the forefront of this innovative company. Drive iQ have produced an app-based programme specifically aimed at supporting the wellbeing of drivers in the workplace.

Drive iQ App

An app-based wellbeing programme designed to put the driver in control of their daily travel experience.

Evidence-based science is used which allows users to become their own behaviour coach:

- coaching modules
- setting goals
- creating personal coping strategies
- tracking weekly progress.

Over time, the Drive iQ technique aims to build small habit changes into sustainable and positive outcomes.

Protecting your property

Resuming operations as safely as possible for you, your employees, and the public is a challenge all businesses need to take seriously. For businesses that have been through a significant period of closure, steps will need to be taken to ensure the premises comply with any new requirements and the implementation of good practice guidelines.

Motor vehicle and plant tracking solutions with VUEtrack

VUE offer tools to improve driver behaviour ranging from 3G connected vehicles, CCTV and tracking, through to telematics equipment, all combined with secure software solutions.

VUEtrack-magnetic

VUEtrack-magnetic, from the VUE Group, is a magnetic long-life battery-powered GPS tracking unit.

This tracking unit provides the motor trade industry greater peace of mind during unaccompanied test-driving of vehicles.

It also has a place in tracking a wide range of other vehicles and plant in many industries.

VUEtrack-magnetic is part of the VUEtrack range. Each unit in the VUEtrack range offers live GPS tracking, speeding alerts, toll and congestion zone alerts, alerts if the vehicle travels beyond a certain distance (geofencing in any shape), and a log of the address where the vehicle is parked.
